Fit cable not properly inserted

Overview

Foreign objects in the charging port will prevent the USB connector from being inserted completely. It's important to note that the USB-C cables and connectors provided with LaCie or Seagate storage devices meet USB standards and are. Did you actually crimp the connector with the appropriate tool?

Just jamming the wires from the cable into the connector won't do. If it is crimped, try crimping it once more. Had that issue a few times before where I didn't squeeze hard enough. Furthermore, the second type of environment dependency can be divided into the. If the cable won't fit in and there's nothing wrong with the cable, then there is still lint or something in the port. Use something like a wooden toothpick to carefully remove anything you find.
