

Ltb optical module

Overview

The LTB and FTB platform series are a highly scalable and versatile platform suite featuring a wide range of modules for optical and data transport testing needs. LTB series offers rack mount configuration and hot-swap capabilities, ideal for lab and intensive manufacturing. Bring power to your lab with a powerful, scalable and hot-swappable twelve-slot rackmount or benchtop platform designed for advanced lab and manufacturing photonic applications. Use the LTB-12 with EXFO's FTBx optical module family for advanced optical testing. EXFO's LTB-8 is a. The LTBe-9110 Arrayed MEMS Optical Switch is available for singlemode fibers in the following configurations: 1x4 and 1x8. The modular design of the easy-to-use LIBSlab (LIBS laboratory) measuring system allows the flexible combination of sample chamber, spectrometer, laser, PC and software as an individual user solution for a wide range of analyses using laser-induced plasma spectroscopy (LIBS). Whether you are creating a 100-Gbps or 400-Gbps, small form-factor pluggable (SFP) module, SFP+ transceiver, XFP module, CFP, X2/XENPAK module. The LMBS-Basic laser module is designed for easy integration into automated production lines. Machining layouts are created in the multiCAM CAD/CAM software and transferred to the control system. The module supports both stand-alone.

Article Content

LTB Modular Test Systems

EXFO LTB lab test systems offer scalable and flexible solutions for test and measurement in manufacturing, automation, optical qualification and R&D.

LTBe-9110

The LTBe-9110 must be connected to an EXFO LTB or FTB platform to operate. The LTB and FTB platform series are a highly scalable and versatile platform suite

Optical module design resources | TI

View the TI Optical module block diagram, product recommendations, reference designs and start designing.

LMBS Basic 2

The module supports laser powers from 1 to 200 watts and covers a wide wavelength range from UV to FIR. It can be operated with either air or water cooling and is ideal for integration into higher-level

Introducing Linear Pluggable Optics (LPO)

Linear Pluggable Optics (LPO) are a new optical transceiver technology. The idea is simple: instead of a DSP (digital signal processor) inside

EXFO LTB-12

With its small format, ultra-powerful processing and highly intuitive interface, the LTB-12 is optimized for lab users to carry out dedicated test applications simply and efficiently for a variety of technologies,

LTB-12 Rackmount Platform | Spec sheet | EXFO

The LTB-12 first-in-class platform is a versatile solution addressing numerous optical measurement applications. Whether in the design lab or during the manufacturing process, the LTB-12 provides

LTB-8 rackmount platform | Spec sheet | EXFO

UTILITY MODULE FTBx-5245/FTBx-5255 Delivers a full range of spectral analysis capabilities for testing lasers, transmitter optical subassemblies (TOSAs), transmitters or full optical systems

Exfo LTB-2 Used Rental Calibration New

New and used Exfo LTB-2 Rackmount Modular Mainframe Optical Test prices, listings, repair, and calibration services

EXFO FTBx-1750

An optical power meter that meets all your power measurement requirements
Designed for the new LTB-8 Rackmount Platform, the FTBx-1750 High-Performance Power Meter and the OHS-1700

LTB-2 | Spec sheet | EXFO

The LTB-2 is a powerful, scalable, two-slot modular rackmount platform designed for optical and multiservice testing in central office/headend environments, data centers and DCI's, and

LTB-2 Rackmount Modular Mainframe

The LTB-2 is a powerful, scalable, two-slot modular rackmount platform designed for optical and multiservice testing in central office/headend environments, data

EXFO LTB-8 USER MANUAL Pdf Download | ManualsLib

For LTB-1, LTB-8, FTB-2, FTB-2 Pro, and FTB-4 Pro: KILL LINS You must specify the logical instrument number corresponding to the module for which you want to

FTB-88000 PowerBlazer Series

Hosted in EXFO's FTB-500 platform, brings lots of flexibilities including; remote management, battery operation, integrated optical tools and the flexibility to combine the module with EXFO's optical

MNL 100 N₂

The Mini Nitrogen Laser MNL 100 is characterized by its long service life, low energy loss and high precision. This is achieved through the patented innovations

LTK-1 | Spec sheet | EXFO

This set of platform-based software testing tools enhances the value of the LTB-1 Platform, providing additional testing capabilities without the need for additional modules or units.
