Overview

ODF 24 Core is a high-density fiber optic distribution frame designed to meet the ever-increasing demands of today's network systems. This product is ideal for data centers, server rooms, and other communication distribution systems where space is limited. OM3/OM4/OM5, Widely used in Data Center, at high speed to support Ethernet Data Transmission. MPO. TMT Global Technology LTD odf 24 core aims to provide the best quality products r Structured Cabling Systems Copper And Fiber Optics Range Access Control Systems Gate Automation Lighting Control Systems Pir Motion Sensors UHF Long Optical distribution Frame ODF 24 core Wall Mounted TMT Range. An Optical Distribution Frame (ODF), also known as fiber distribution frame or optical fiber distribution frame, is the central cross-connect and termination hub in fiber optic networks. It provides fiber fixing, splicing, termination, patching, and cable management in telecom rooms, data centers. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function.
