

Steel Structure Hoisting Cable Tray Support

Overview

Horizontal hoisting is a common method for installing cable trays, especially when overhead support is available. Cable tray supports provide all of the structural support required for the cable trays, and they can be assembled in a number of configurations as required for the particular installation. UNITECH's metal framing channel is cold formed on modern rolling machines from low carbon. All systems are available in both high-quality steel and stainless steel versions. Accessories specially adapted to the systems enable simple and flexible installation. OBO BETTERMANN has offered products and solutions for electrical installation for over 100 years. Our focus has always been on solutions from the field of cable support systems. Establishing partnerships. HDT steel cable tray, for heavy duty job, comes in standard height of 50 and 100mm.
